John

Did you get any feedback on these two?

Maureen

Subject: FW: Advanced Notification - 2 NCEA manuscripts on exposure to environmental chems in breast milk and formula

John,

Attached are two related manuscripts on the exposure to environmental chemicals in breast milk and formula. As Geniece is lead author on one, you are likely familiar with them. There do not seem to be any policy concerns, so please share these manuscripts as an FYI with OCHP, OW, OCSPP and OLEM. While we do not expect any comments, we will wait a week or so to make sure no issues arise before closing out of the advanced notification process.

I'm cc-ing other relevant NPDs as a heads-up, but as this is an HHRA product notification

would fall to you.

Thank you,

Maureen

Subject: Advanced Notification - 2 NCEA manuscripts on exposure to environmental chems in breast milk and formula

Hi Bob,

Happy New Year! I've attached a belated holiday present from NCEA – 2 manuscripts on breast milk and formula and environmental chemicals. Given the subject matter they meet the advanced notification criteria. The manuscripts are intended to be submitted jointly to EHP. A manuscript information sheet that covers both papers is also attached.

The two manuscripts examine the potential consequences of exposure of infants to chemicals in mother's milk and formula. The first article looks at risk assessment methods, while the second article provides a systematic evaluation of the epi literature looking at

breast milk and environmental chemicals (more detail in the manuscript information sheet).

Author affiliation includes NCEA, NERL, and one individual who at the time was in OCHP (now in OCIR). Staff level reviews were provided from the following offices, by individuals not involved in the development of the manuscript: NHEERL, OPPT, NCEA, and OCHP. Pesticides, among other chemicals, are included in the manuscript, so OPP may be a group that would expect outreach.

No major communications plan associated with this manuscript. We anticipate doing a little more than the standard desk statement and including some Q&As.

Let us know if you have any questions.

Best,

Lou
